ANTON IGUDESMAN

(415) 218-4086 ♦ antonguy@gmail.com ♦ 6117 2nd Ave, Sacramento, CA

Technical Skills

- HTML/CSS/CSS Grid
- Bootstrap Framework/Flexbox
- Javascript/Object Oriented Programming
    - Asynchronous Programming
    - REST API
- React Framework
    - Redux – Thunk for asynchronous state management
    - useReducer, useContext
- Express.js server
- GraphQL alternative to using REST API
- Python scripting

Projects

Apollo Music Player

- Using HTML/CSS and React.js to create a music player utilizing Apollo Client to manage GraphQL server queries.
- Users can import songs from either YouTube or SoundCloud and create dynamic playlists.
- Full functionality includes importing songs, which automatically generates thumbnail image, as well as artist and song info from respective website.
- App allows ability to create continuously playing songlist queue, as well as fast forward, play/pause and remove from queue functionality.

Face-Recognition App

App allows for user login utilizing database to persist information and allow users to keep track of photos they have uploaded into the face recognition app. Technology allows a user to grab the link to any image found on the web featuring a person's face. When the user enters the link to the image the app will display the image and be able to detect where the face is in the picture, and display a blue box around it. The app also tracks how many pictures a user has submitted over time. Project utilizes React.js for front-end and Redux for state management, with and Express.js server taking care of the API calls and running a PostgreSQL database running on Render host site.

Professional Experience

Tyler Technologies Oct 2022 – Present
Javascript Conversion Project

- Software provides case management system to legal justice jurisdictions around the country – allows for easy and consolidated case management for clients to consolidate data.
- Converting antiquated VB Script into modern JavaScript language to update case management software as part of larger transition project.
- Debugging code post-conversion to make sure it behaves identical to software pre-conversion.
- Tracing call stacks and validating conversion methods using JavaScript in browser debugger.
- Working with XSL style sheets and XML transform language throughout the course of program conversion.
- Utilizing Jira Kanban sprint methodology to plan and document task progress.
- Using Confluence as knowledge base of previous conversion tasks.

Music Traveler Oct 2022 – Present
Web Developer
- International start-up working on Air BNB model, for connecting traveling musicians with practice spaces on the go.
- Working with Python Django for front and back end, as well as JavaScript for front end.
- Providing support to Lead Engineer for debugging and style changes.
- Creating new SEO program for complicated project to boost site performance within key geographical targets.
- Researched complex SEO problems stemming from website being offered in German and English languages – dual languages made SEO performance harder, because site traffic was split between languages.
- Creating media page to help with SEO performance and adding previously back-linked articles to build web authority.

Bay Valley Tech Code Academy Jan 2022 - Present
Skills covered include:
- Process and layout of coding projects
  - Planning and pseudo-code
- Content Management Systems
- HTML/CSS
  - Flexbox
  - Bootstrap
- Javascript
  - Data structures and algorithms
  - Object Oriented Programming
  - ES6 classes and Constructors
    - Object Inheritance
- React.js Library
  - ES6 syntax
  - Hooks and Props
    - useEffect, useState, useContext, useReducer

Recruiting Manager, 01/2022 – Present
SearchPros Staffing – Sacramento, CA
Accomplishments:
Was able to place 15 candidates with companies such as Boeing, BART and SMUD – billing companies upwards of $12,000 monthly.
- Using sourcing tactics/tools such as LinkedIn, Indeed, Monster, CareerBuilder and JobDiva Talent Acquisiton software to contact passive and non-passive candidates.
